

Sapman v12

The alternative to Sage's 50 and 200 Manufacturing Systems

Sapphire Manufacturing's Sapmanv12 is a highly sophisticated Enterprise Resource Planning (ERP) system for manufacturing, assembly, distribution and full stock control. Sapman v12 seamlessly integrates with Sage Line 50 or Sage Line 200 Accounts modules – you choose!

IF YOU NEED

the power and features of a Sage 200 manufacturing system but prefer Sage 50 accounts take a look at Sapman v12.

IF YOU WANT

the extra features of Sage 200 Accounts then you have another option with Sapman v12.

IF YOU ARE LOOKING FOR

a comprehensive warehouse, distribution & stock control solution, including full inventory management, barcoding & labelling, batch & serial number traceability, BoM and full audit trail, Sapman v12 is the answer.

IF YOU MAKE STUFF WE'LL HELP YOU MAKE IT.

IF YOU HAVE A WAREHOUSE WE'LL HELP YOU MANAGE IT

IF YOU HOLD STOCK WE'LL HELP YOU CONTROL IT.

Our highly skilled team has 20 years of experience resolving our customers' Assembly, Manufacturing Control and ERP requirements, and their Stock Control and Warehouse Management needs using our advanced, effective and efficient software solution.

Sapman v12 fully integrates with Sage's Accounting solutions: Sage 50 and Sage 200. It also provides an upgrade path to Sage 100. Sapman v12 is highly customisable to operate with virtually any business model. With successful installations in a huge range of industry types from manufacturers of medical products to disposable BBQs, our customers rely on Sapman v12 to run their businesses.

At its core Sapman v12 is a sophisticated Manufacturing, Warehousing and Stock Control solution. This modular product provides extensive facilities for Stock Control, Sales and Purchase Order Processing, Warehouse Management, Bill of Materials, Works Order Processing, Engineering Control, MRP and CRP. With the Microsoft SQL database engine at its core this product provides a leading edge business management solution.
